

Slice brand sheet

Six pieces of one cake. A mark built from geometry, one gradient that flows through everything it touches, and heavy type that stays quiet around it. This is the sheet a brand team hands over; everything on it is also a rule the gate can score.

exploration 01 · 2026-09-14 · source: brand/tokens.json, brand/rules.md, brand/build_mark.py

The mark

Six pie slices, apex down, apex up, in a 3:1 band.
The flow runs through all six as one field.

Clear space

One slice radius on every side. Minimum width 96 px on screen, 28 mm in print.

The mark is never rotated, mirrored, outlined or given a shadow. A single slice may stand alone as the avatar or favicon unit.

Colour

Three grounds, one ink, six gradient stops. The stops are for the flow; only pink and sky ever appear as flat accents.

The flow

One gradient, left to right, cool to warm. Raw on the mark and on display type. Softened when it is a ground.

Type

Alpino for everything that is read. Nagoda only where the brand speaks in one line.

Cut it into pieces you can ship.

Alpino Black display, -0.035 em two lines max

S L I C E

Alpino Black wordmark, 0.42 em pink or ink or white

Slices of birthday cake inspiration

Nagoda Regular voice line only never body

A brand that stays itself across a hero, a story card, a Slack avatar and a printed poster, and still has room to move. Body copy sets in Alpino Regular at 17 px with a line height of 1.5, under 75 characters a line.

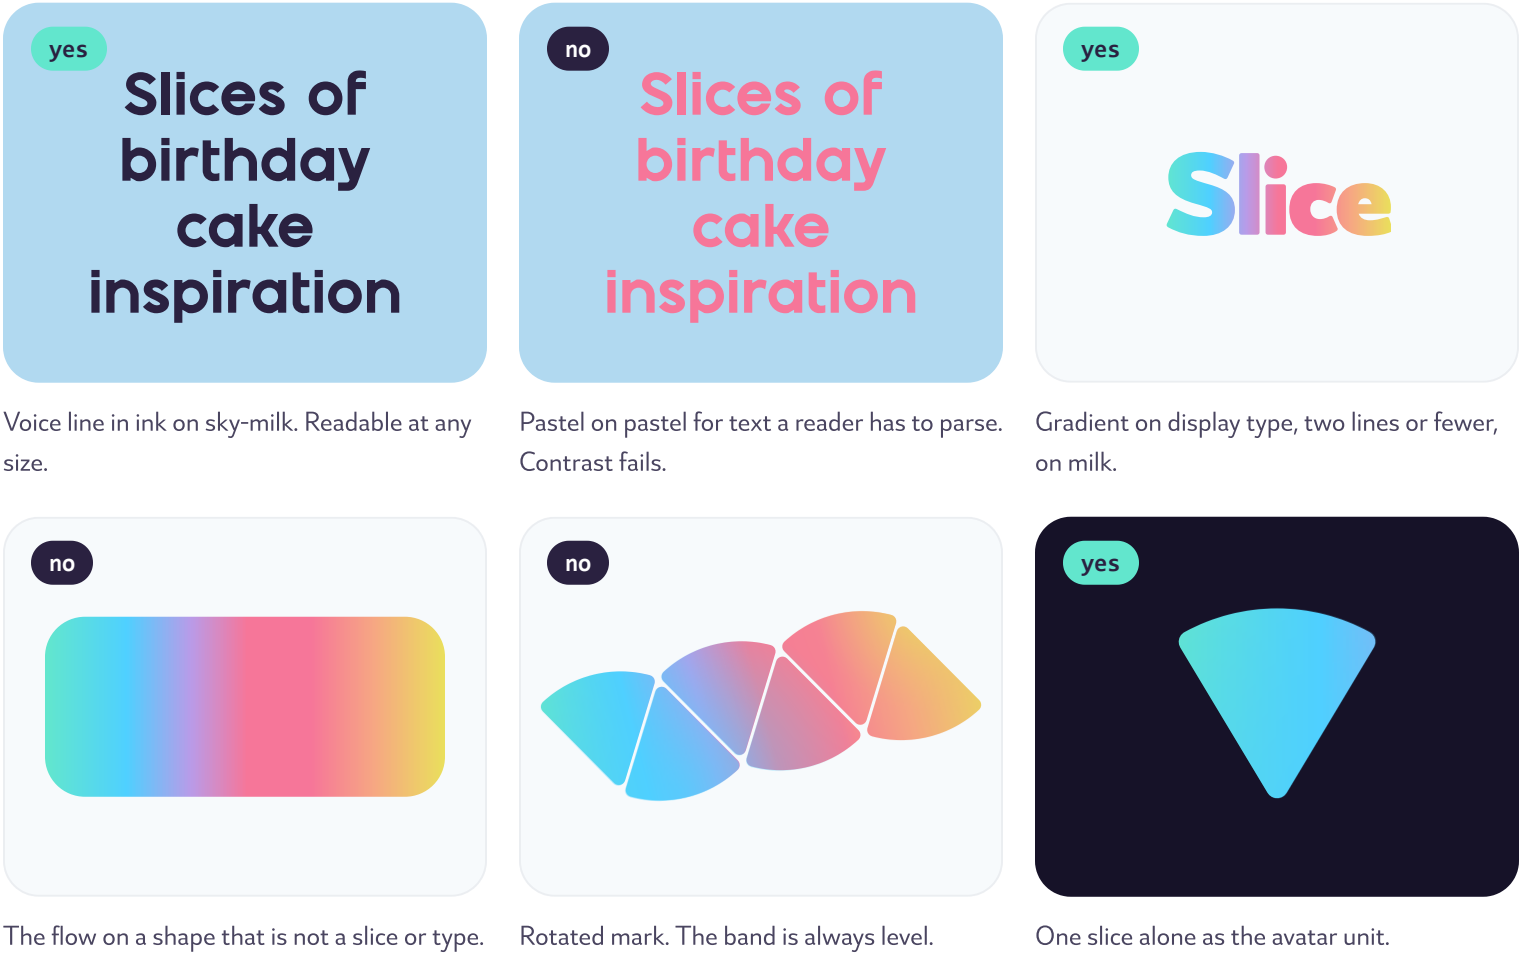

Alpino Regular body, 17 / 1.5

IBM Plex Mono code and data only

Do and do not

Each of these is a check the gate runs.

Geometry

Measured off the PSD and regenerated by brand/build_mark.py, so the animejs ident and the gate read the same numbers.

slice radius	189
apex angle	62°
pitch	209
stagger	104.5 right, 40 down
seam	6
corner round	22 stroke, round join
band aspect	2.95 : 1
